LEAP 3050 Global Perspectives on Aging

Get involved. Make it personal. Be a LEAP SCHOLAR.

→ Make the Big U feel small! Open to ALL students

→ A great way to get connected
  o Small class sizes
  o Same classmates, professor & peer advisor
  o A dedicated class librarian

→ Maintain an efficient graduation schedule by completing a bonus General Ed requirement- BF and IR credit for completing one semester of LEAP.

→ A good options for transfer students or students with an Associate’s Degree.

DEALING WITH DIFFERENCE

Population Aging Matters: A Global Perspective

Aging is a global issue taking place alongside other broad social trends that will affect the lives of every living thing. As economies are globalizing, people are more likely to live in cities, and our use of technology will continue to evolve rapidly.

Demographic shifts in the world’s population will continue to impact the way we act. Some of these changes include: people having fewer children, fewer people are getting married, and many households have multiple generations under the same roof.

We as a society will need tools to adjust to these changes to ensure the well-being of the world’s citizens.

This course will explore the intersections and impacts of aging and the impact on the available workforce, technology, healthcare, communities and families. It will look at differences and similarities across cultures, as well as the social and economic implications associated with changing populations.
