Introduction to Health Geography

How does air pollution lead to hospitalization and school absences in Utah?

How is pesticides exposure associated with Parkinson’s Disease in Nebraska?

How does spatial access to primary care influence individuals’ risk of cancer diagnosis?

How can smartphone and wristbands be utilized in health, healthcare, and environmental studies?

This course is designed to provide students with a broad introduction to health geography. It will focus on health, healthcare, and environmental topics that involve the use of GIS and spatial methods. Students will understand the theory, methods, and techniques of health geography through application topics mentioned above.

This class is only offered every other year!!
